# Table of Contents

<b>Structure, Neoformation and Functions of CNS Blood Vessels</b>	<b>1</b>
Chapter 1. Development of CNS Vasculature	2
Chapter 2. Neoformation and Repair Mechanisms of CNS Blood Vessels	9
Chapter 3. Anatomy and Structure of Brain Blood Vessels	14
Chapter 4. Blood-Brain Barrier, Exchange of Metabolites and Gases	22
<b>Brain Edema, Intracranial Pressure and Drainage Pathways</b>	<b>31</b>
Chapter 5.1. Pathology of Brain Edema and Brain Swelling	32
Chapter 5.2. Pathophysiology of Brain Edema	39
Addendum: Anomalous Osmosis of Water into Animal Cells	47
Chapter 6. Drainage Pathways of CSF and Interstitial Fluid	50
<b>Thrombosis</b>	<b>57</b>
Chapter 7. Basic Mechanisms, Acquired and Genetic Defects Associated with Thrombosis	58
Chapter 8. Antiphospholipid Syndrome and Cerebral Vascular Disease	62
Chapter 9. Thrombolytic and Antithrombotic Therapies in Acute Stroke	68
<b>Vascular Wall Changes in Large and Small Vessel Diseases</b>	<b>73</b>
Chapter 10. Pathogenesis of Carotid Atherosclerosis: Molecular and Genetic Aspects	74
Chapter 11. Small Vessel Disease	85
<b>Amyloid Angiopathy</b>	<b>93</b>
Chapter 12. Cerebral Amyloid Angiopathy	94
<b>Aneurysms and Vascular Malformations</b>	<b>103</b>
Chapter 13. Saccular (Berry) Aneurysms	104
Chapter 14. Fusiform, Infectious and Other Aneurysmal Lesions	112
Chapter 15. Vascular Malformations and Angiomas	119
Chapter 16. Interventional Neuroradiology	125
<b>Vasculitis</b>	<b>133</b>
Chapter 17. Giant Cell Arteritis	134
Chapter 18. Takayasu Arteritis	140
Chapter 19. Primary Angiitis of the Central Nervous System	147
Chapter 20. Systemic Diseases and Drug-Induced Vasculitis	151
<b>Other Blood Vessel Diseases</b>	<b>163</b>
Chapter 21. Fibromuscular Dysplasia	164
Chapter 22. Moyamoya Disease	169

<b>Focal Brain Ischemia</b>	<b>175</b>
Chapter 23. Focal Brain Ischemia. Clinical Features, Epidemiology, Risk Factors and Outcome	176
Chapter 24. Imaging Investigations in Cerebral Ischemia: MRI and CT	186
Chapter 25. Imaging Investigations in Cerebral Ischemia: PET and SPECT	194
Chapter 26. Pathophysiology of Focal Brain Ischemia	201
Chapter 27. The Neuropathology of Focal Brain Ischemia	215
Chapter 28. Therapy of Focal Brain Ischemia	222
Chapter 29. Experimental Models of Focal Brain Ischemia	227
<b>Global Brain Ischemia</b>	<b>237</b>
Chapter 30. Global Brain Ischemia. Epidemiology, Risk Factors, Clinical Features and Treatment	238
Chapter 31. Pathophysiology of Global Brain Ischemia	243
Chapter 32. The Neuropathology of Global Brain Ischemia	255
Chapter 33. Experimental Models of Global Brain Ischemia	260
<b>Hypoglycemic Brain Damage</b>	<b>269</b>
Chapter 34. Hypoglycemic Brain Damage	270
<b>Gas and Fat Embolism</b>	<b>277</b>
Chapter 35. Gas and Fat Embolism	278
<b>Brain in Hypertension</b>	<b>285</b>
Chapter 36. The Brain in Hypertension	286
<b>Brain Hemorrhages</b>	<b>293</b>
Chapter 37. Parenchymal Brain Hemorrhage	294
Chapter 38. Subarachnoid Hemorrhage	301
Chapter 39. Extradural and Subdural Hematomas	308
<b>Vascular Dementia</b>	<b>315</b>
Chapter 40. Acquired Forms of Vascular Dementia	316
Chapter 41. Hereditary Forms of Vascular Dementia	324
<b>Spinal Cord Vascular Disorders</b>	<b>335</b>
Chapter 42. Spinal Cord Vascular Disorders	336
